TRAINING SESSION PLAN

TITLE: STEAM BOILER ENGINEER GRADE 1

TIME: 09:00AM to 16:00PM

Objective:

1. Trainees will gain an understanding of the legislation and standards related to steam boilers, including occupational safety and health regulations, codes of practice, guidelines, and roles and responsibilities of steam engineers.
2. Trainees will gain an understanding of the codes and standards, conceptual design, actual design, components, fittings, and safety devices related to boiler design.
3. Trainees will gain a comprehensive understanding of boiler operation, including fundamental responsibilities, safety precautions, emergency procedures, maintenance practices, steam management, and efficiency considerations.
4. Trainees will gain an understanding of boiler defects, potential root causes, materials, creep and fatigue, corrosion and control, welding and welding mechanical failure, and non-destructive testing and inspection (NDT/NDE).
5. Trainees will gain an understanding of machinery integrity, including the concepts of fit for services and process safety management.

DAY 1

LEARNING POINT	TIME
Legislation and Standards (2 Hours) a. Occupational Safety and Health Act 1994, its regulations, and subsidiary legislations. b. Occupational Safety and Health (Factories and Machinery Requiring Certificate of Fitness) Regulations 2024. c.
